

Within [Perce White Reserve](#), wheel stoppers will be installed at select parking bays in the car park adjacent to the Maritime Cove Playground. These stoppers will support safer parking movements and improve pedestrian safety.

Works are scheduled (subject to change): Wednesday 17 June 2026, from 5:00am to 5:00pm.

17 parking bays, including DDA bays, will remain available during this period. The bays along the southern side of the road (highlighted in green) will be temporarily closed to allow for installation works.

Please note that standard parking restrictions apply, and unattended vehicles may be towed after 11:00pm.

If you have any questions or require further information, please contact us via either of the below channels.
